

## **UK Shared Prosperity Fund**

Interventions, Objectives, Outcomes and Outputs -

England

Version 1 April 2022

## Interventions, Objectives, Outputs and Outcomes

To access their allocation, each place will be asked to develop a UKSPF plan that addresses three questions:

- Local context: an opportunity for places to set out their local evidence of opportunities and challenges through the lens of the three investment priorities for UKSPF.
- Selection of outcomes and interventions: where places will identify the outcomes they wish to target based on local context, and the interventions they wish to prioritise, under each investment priority, from the menu of options. These should be clearly linked to local opportunities and challenges.
- **Delivery**: this will represent the most detailed stage of the investment plans.

Within the context of the Fund's aims, each place will have flexibility to invest across a range of activities that represent the right solutions to improve local pride in place, increase life chances, to help spread and create opportunity, and a sense of community and belonging. The balance of priorities should reflect local need and opportunity. It should build on existing national provision to create the optimal mix of support for each place. This flexible approach represents a key shift from the previous EU system.

These interventions will be set out in an investment plan submitted to the UK Government.

In their plans, places will select outputs and outcomes relevant to each UKSPF investment priority. Places will set out measurable outcomes that reflect local needs and opportunities. These should inform the interventions they wish to deliver. Places will be able to choose from investment across three investment priorities of communities and place, local business and people and skills. This will allow lead local authorities, local partners, the UK Government, and the devolved administrations to monitor progress.
