

NOTTINGHAM CITY RECYCLING & WASTE REDUCTION PROGRAMME FOR SECONDARY SCHOOLS

REDUCING WASTE. EMPOWERING STUDENT LEADERSHIP.
CONNECTING LEARNING TO THE REAL WORLD.

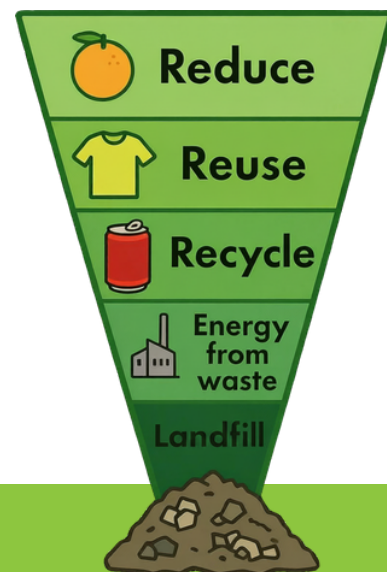

A FLEXIBLE, FULLY-FUNDED SUSTAINABILITY PROGRAMME TAILORED
TO YOUR SCHOOL'S PRIORITIES.

A FLEXIBLE, BESPOKE APPROACH

The Nottingham City Council Recycling and Waste Reduction Education programme supports secondary schools across the city in delivering Nottingham-specific waste and recycling education that connects learning to real-world systems, school priorities and future pathways. We work alongside schools to enrich existing provision, offering meaningful opportunities for students to explore their city's waste and recycling processes, develop leadership and responsibility on issues that matter to them and engage with real-world environmental challenges.

Our secondary offer is intentionally flexible – allowing schools to shape a programme that adds value in their context through:

- High-quality enrichment aligned to your curriculum
- Enhanced personal development opportunities
- Support for student leadership and voice
- Engagement with local industry and infrastructure
- Contributing towards whole-school sustainability ambitions.

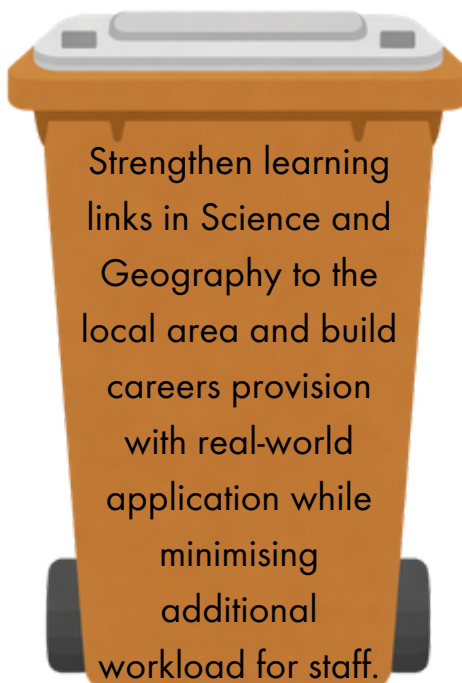

WHAT WE OFFER

ASSEMBLIES AND WORKSHOPS

CURRICULUM SUPPORT

STUDENT LEADERSHIP

YOUR SCHOOLS ENGAGEMENT OFFICER

The programme is delivered by James, Schools Engagement Officer at Nottingham City Council, a qualified teacher (PGCE) with 7 years' classroom experience and an enhanced DBS certificate.

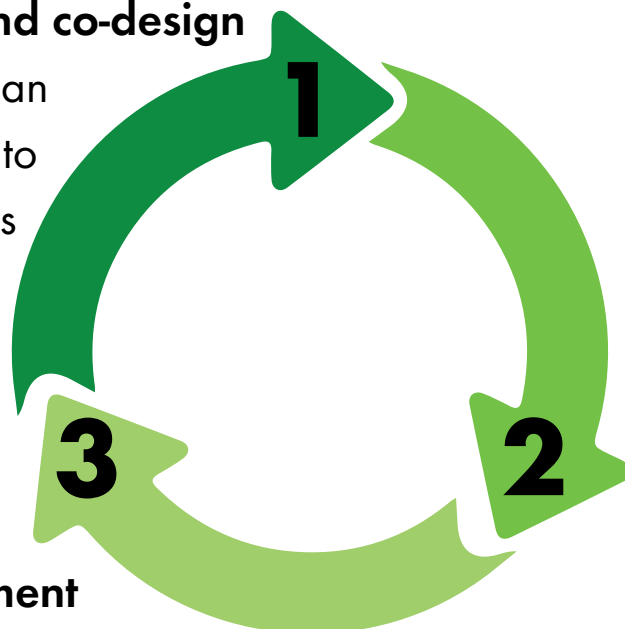

James is delivering the programme to a wide range of primary and secondary settings across the city, working flexibly with schools to tailor support to their priorities, and helping staff deliver high-quality sustainability education without adding to teacher workload.

Combining his professional knowledge of delivering engaging, curriculum-relevant learning in schools with knowledge of Nottingham's waste and recycling systems, James ensures sessions are practical, relevant and easy to integrate within your school's provision and objectives.

HOW IT WORKS

1. Initial discussion and co-design

We explore how we can tailor the programme to align to your school's priorities.

2. Delivery

Our Schools Engagement Officer delivers bespoke assemblies and workshops, engages with staff in curriculum design or supports student-led opportunities.

3. Ongoing development

Review of engagement and explore opportunities to extend impact.

EXAMPLE PROGRAMMES

DEVELOPING STUDENT LEADERSHIP

- Introductory assembly on the role household waste plays in supporting Nottingham's District Heat Network.
- Eco Council support to identify actions to meet the school's sustainability priorities.
- Ongoing student-led litter-picking project in the community.

IMPACT: Increased confidence, leadership skills and student engagement.

BROADENING CAREER HORIZONS

- Careers Week assembly or workshop introducing Nottingham City Council's waste management obligations and challenges.
- Curriculum design support for Geography staff to integrate waste management careers into the curriculum.
- Follow-up trip to the Materials Recovery Facility to meet professionals in an industrial context.

IMPACT: Awareness of career options, engagement with professionals and workplace experience.

KS3 CURRICULUM DEVELOPMENT

- Waste Hierarchy assembly introducing pupils to the impact everyday actions can have on sustainability.
- Curriculum design support for Science staff in the efficacy of recycling different materials.
- Students engage in Christmas Jumper and/or World Book Day swap initiatives to reuse clothing items sustainably.

IMPACT: Awareness of impact of individual actions, application of curriculum learning through tangible actions.
