Development Plan Document

Local Plan Part 2

In order to identify outstanding objections, the Council has scrutinised representations made at both Publication and Revised Publication stages and assessed whether any related changes the Council made/proposed resolve the objection.

All representations have been read and a judgement has been made on whether the comment supports or objects to the plan. If neither support/object then this has been recorded as other. In the Resolved column the Council has recorded “yes”/”no” (or N/A where the representation supports the LAPP). Where a representation is considered to be only partially resolved, it has been recorded as “no” (unresolved).

By way of further explanation, a ‘comments’ column has been included and populated with one of the four bullet points below. However additional comments also appear against some of the representations in order to assist the Inspector.

- **Amendments made to address respondent comments.**
- **Respondent comments assessed but no change made to the Plan.**
- **Amendments made which may partially or fully address respondents comments.**
- **Amendments made which fully meet respondents comments.**

Also included in the table is a column relating to soundness. Where a representation is considered to be an objection that has not been resolved, it has been recorded as unsound. A representation that has been resolved or supports the plan has been recorded as sound. Where a representation neither supports nor objects to the plan N/A appears in this column.

It should be noted that this table represents the Council’s current view only and will not prejudice any representors. All representations will be given due consideration by the Inspector who may arrive at a different conclusion.
