

What is Drug/Substance Misuse?

			
<p>When people use drugs they feel lots of different feelings. Sometimes they are happy sometimes sad, sometimes they are angry and sometimes they feel worried.</p>	<p>Drugs can make people feel great for a while but if they keep taking drugs they can find difficult to stop and they just want more and more and they just think about how they can get more.</p>	<p>Sometimes because a person wants a drug so much they end up doing things that they wouldn't normally do they steal and lie so that they can buy them.</p>	<p>It can hard living with a person on drugs as you don't know what they are going to be like, they might ignore or shout at you even if you haven't done anything wrong.</p>
