

## **Public Space Closed Circuit Television (CCTV) Evaluation - 1<sup>st</sup> January to 31<sup>st</sup> December 2023**

### **Description of the Scheme and the Geographical Area(s) of Operation**

Public space CCTV provision is an effective tool available to local authorities and their partnerships to address crime, anti-social behaviour and improve security. Local authorities as responsible authorities under the provisions of the Crime and Disorder Act 1998 (and as amended) have a responsibility, not only to develop community safety plans but also to consider the impact of all their policies on crime, anti-social behaviour, substance misuse and reoffending.

Nottingham City Council provides a comprehensive range of services across the public safety spectrum, which include Community Protection enforcement, housing enforcement, licensing and cleansing. The Nottingham Control Centre based at Woodlands in Radford manages the public space cameras of Nottingham City Council. There are 286 public space cameras covering Nottingham City; 274 of these are monitored continuously with operatives in direct communication with Nottinghamshire Police. The remaining 12 CCTV Cameras require the operator to dial into the camera to view and airtime is used to be able to undertake live viewings. All cameras are recording 24/7 for the required 31 days.

Under the Surveillance Camera Commissioner: Code of Practice<sup>1</sup> it is a requirement that:

- Surveillance camera system images and information should be subject to appropriate security measures to safeguard against unauthorised access and use.
- There should be effective review and audit mechanisms to ensure legal requirements, policies and standards are complied with in practice, and regular reports should be published.
- When the use of a surveillance camera system is in pursuit of a legitimate aim, and there is a pressing need for its use, it should then be used in the most effective way to support public safety and law enforcement with the aim of processing images and information of evidential value.
- Any information used to support a surveillance camera system which compares against a reference database for matching purposes should be accurate and kept up to date.

---

<sup>1</sup> Home Office website: [Surveillance camera code of practice - GOV.UK \(www.gov.uk\)](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/672222/surveillance-camera-code-of-practice-2018.pdf)

The Control Centre within the Woodlands meets all of the requirements above, which are annually audited as part of holding the following accreditations and compliances:

- BS 7958:2015 Code of Practice for the Management and Operation of CCTV
- ISO 9001: 2015
- BS 7858 Security Vetting
- BS 5979 – Alarm Receiving Centre
- Fully compliant with Surveillance Camera Code of Practice (2013)

There are two configurations to the public space CCTV:

1. *Permanently installed cameras* - which are hard wired into a leased analogue/fibre provider (such as BT, Virgin)
2. SIM technology to transmit images back to the operator using data allowance

Cameras locations by area are as follows:

<b>Area</b>	<b>Number of Permanent &amp; Deployable Cameras</b>
Central	129
North	77
South	80

In addition to the core public space CCTV stock, there are 12 4G Redeployable cameras that wards have purchased in previous years to address local anti-social behaviour (ASB) issues. The table below shows where they are currently located:

<b>Ward</b>	<b>Count of RVS Camera</b>
Berridge	1
Bestwood	2
Bilborough	1
Bulwell	3
Castle	1
Dales	1
Radford	1
<i>CCTV Stores*</i>	2
<b>Grand Total</b>	<b>12</b>

*\*Spare CCTV Awaiting Installation*

The 4G Redeployable cameras managed by the CCTV control room, which are placed for short-term solutions in response to ward or police requests.

## **Scheme's Policy Statement:**

“To provide product and service, which gives total customer satisfaction”

We recognise that our continued success depends upon the price delivery and quality of our service.

- The quality of our service must be of the highest standard possible if we are to exceed the ever-increasing standards set by our customers.
- We will strive to continually develop and maintain the right attitude towards high quality achievement throughout the company.
- This is how we will achieve complete customer satisfaction.

It is the policy of the Company<sup>2</sup> to ensure the continual improvement of our overall performance. In addition to maintaining, on a continual basis, an effectively managed Quality Assurance programme, which will assure customers that the products supplied conform to the laid down procedures or disciplines of the Company, which will ensure that we satisfy and exceed the expectations and needs of our Customers.

To achieve this objective, we operate a quality management control system to BS EN ISO 9001: 2015 standards that is described in this manual and satisfies the requirement of:

All British and European and listed within the Excel Spread Sheet “Index of Quality Management System”. Adherence to this policy involves all of our activities and services, and their effects.

This policy is understood, implemented, and maintained at all levels within the organisation. The policy includes the setting and publication of our quality objectives and this policy is publicly available.

The Neighbourhood Safety & Operations Manager – Residential Services, has the ultimate responsibility for the effective operation of the Quality Management System.

Our organisational goals are to ensure that the changes required within our documented management system to meet the requirements of the above standards and Codes of Practice are performed in a managed methodical way to ensure that the system is fully understood and implemented throughout the Company.

*A signed copy of this Policy can be obtained from the Neighbourhood Safety & Operations Manager.*

---

<sup>2</sup> Company is Nottingham City Council, Security & Logistics service.

### **The Objective and Scope of the Scheme:**

The following purposes have been established and notification has been registered with the Information Commissioner for the Nottingham City CCTV and associated systems:

Initiatives under the crime & disorder act including participation in crime reduction partnerships, serving of anti-social behaviour orders etc.

Operation of CCTV systems in Public Spaces, housing estates, council premises where the object is the prevention and detection of crime and community safety programmes.

Note. This purpose is designed to describe general crime prevention initiatives. More specific activities, for instance the investigation and prosecution of cases of benefit fraud are recorded under the relevant purposes.

Nottingham City Council and partners support the individual's right to privacy and will insist that all agencies involved in the provision and use of Public CCTV systems connected to the Nottingham City Council's CCTV Control Centre accept this fundamental principle as being paramount. Before cameras are placed in residential areas the residents in that area will be consulted concerning the proposed system. The results of the consultation will be considered as part of the completed Data Protection Privacy Impact Assessment (DPIA).

The public interest in the operation of the scheme will be recognised by ensuring the security and integrity of operational procedures.

The system will continue to be operated by trained and authorised personnel.

The scheme aims to provide surveillance of the public areas in order to fulfil the purposes of the scheme. The area protected by CCTV is indicated by the presence of signs. The signs are placed so that the public are aware that they are entering a zone, which is covered by surveillance equipment. The signs state the organisation responsible for the scheme, the purposes of the scheme and a contact telephone number. Data will not be held for longer than necessary and disposal of information will be regulated.

The scheme is registered with the Information Commissioner. The registration number is **Z5833067**. The scheme will be managed in accordance with the principles of the Data Protection Act 1998, Human Rights Act 1998, and all other relevant legislation. Reviews of Data Protection and Legal Requirements are taken annually.

Includes use of closed-circuit television for the monitoring and collection of visual images for the purpose of maintaining the security of premises, for preventing crime and investigating crime.

**The Operation:**

In 2023, across the Nottingham City boundary (divided in this report into the localities of Central, North & South), 286 fully functional CCTV cameras were monitored by Nottingham Control Centre 24 hours a day 365 days a year by trained staff who have been screened in accordance with British Standard 7858 and NPPV Level 2.

All employees engaged in the monitoring and operation of CCTV have received training to the standards required by the Private Security Industry Act 2001. As a further requirement of the above Act all operators are licensed by the Security Industry Authority (SIA).

In addition to the live feed cameras, the CCTV scheme has a stock of 12 redeployable cameras. These are placed in areas identified as having high levels of Anti-Social Behaviour. During 2023, 24 reactive viewings took place of these 4G style cameras, of which 19 of these viewings were taken as footage. Management of these cameras and their placement is through a partnership forum; attendees include police, children's services, street scene, and community protection. The impact of these cameras is very direct in that they often disperse the crime from the original area of concern.

**Data Protection Impact Assessments & Subject Access Requests:**

During 2023, there were 31 Data Protection Impact Assessments completed to support the installation of the CCTV cameras. (Add further wording)

## **REVIEWS UNDERTAKEN BY POLICE AND EXTERNAL AGENCIES**

In total the Control centre had 2550 viewings of which 2275 of these resulting in footage being taken as evidence. The highest proportion of viewing requests are related to 'Theft Offences' and 'Violence Against Person' related incidents.

We utilise Cryptshare and NICE to securely send over most of the CCTV footage requests. Of which, 95% of CCTV Footage is requested by the Police & Partner Agencies. Since the introduction of encrypted transfer files, which are sent electronically, evidential footage has increased twofold.

The Control Centre processed 3 Subject Access requests on the systems that is monitored within the CCTV Control Centre.

### **The Aims and Objectives for the Next 12 Months:**

Work continues to have a fully integrated physical security information management system (PSIMS), which will give greater efficiency and savings as the system allows the operation for Public Space CCTV monitoring, Concierge, car parking operations and alarm handling all from one workstation.

We have submitted a plan to the Council to set up a replacement programme for our ageing stock which will over a rolling 12 month period resulting in 10% of our stock being replaced with newer IP cameras as we move away from analogue. The advantages of IP are clear to see giving higher video quality than analogue cameras and offer more video site range, such as wide or narrow field of view and better zoom in quality.

We have installed a new network around the Clifton area of Nottingham. Resulting in 6 new IP type cameras operating in this area. We are now extending this to cover Bulwell and Broxtowe within the next 12 months. (*Complete March 2025*).

Working with the Police Crime Commissioner (PCC) Safer Street Funding are looking to increase CCTV Cameras specifically within the Clifton and Bulwell area.

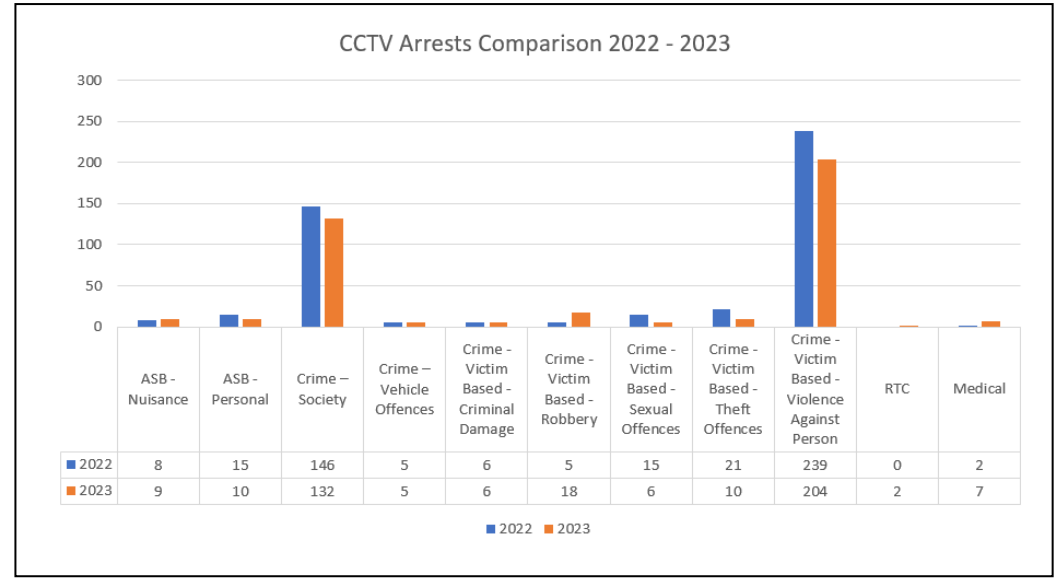

As the development continues to grow within the Broadmarsh area of Nottingham. To increase safety around the new Broadmarsh Green Heart, we are looking to install and introduce new IP 360 type cameras. These will be the first of this type that the Council have to monitor public space.

We have submitted a plan to the Council to set up a replacement programme for our ageing stock which will over a rolling 12 month period resulting in 10% of our stock being replaced with newer IP cameras as we move away from analogue. The advantages of IP are clear to see giving higher video quality than analogue cameras and offer more video site range, such as wide or narrow field of view and better zoom in quality.
