#### Introduction

- 1. Section 88P of the School Standards and Framework Act 1998 (the Act) requires every local authority to make an annual report to the adjudicator. The Chief Adjudicator then includes a summary of these reports in the annual report to the Secretary of State for Education. The School Admissions Code (the Code) sets out the requirements for reports by local authorities in paragraph 6. Paragraph 3.30 specifies what must be included as a minimum in the report to the adjudicator and makes provision for the local authority to include any other matters. Paragraphs 6 and 3.30 of the Code require that each local authority publish its report locally.
- 2. This year's report must cover the 2024/2025 academic year and be submitted to the Office of the Schools Adjudicator (OSA) by 31 October 2025.
- 3. Please note that, in response to feedback on the previous template and in the light of consultation with a group of local authorities, changes have been made to various sections of this year's template.

#### **Guidance on completing the template**

- 4. We have included all the guidance on completing specific parts of the template in this section. There is no requirement for local authorities to include the introduction and the guidance in their published reports, but they are free to do so if they wish.
- 5. We should be grateful if in completing questions which ask for information about primary and secondary schools and/or pupils, local authorities would follow the approach to classification of schools used in statutory provisions and in the Department for Education Statistical First Release<sup>1</sup> and the Education Middle School (England) Regulations 2002<sup>2</sup>.
- 6. The Code sets out some minimum requirements on the contents of each local authority report stating that each must cover as a minimum "information about how admission arrangements in the area of the local authority serve the interests of looked after children and previously looked after children, children with disabilities and children with special educational needs, including any details of where problems have arisen."
- 7. The Department for Education's aim through the annual reports from local authorities is to understand how well the admissions system is working nationally, rather than to hold individual local authorities to account. By understanding the effectiveness of the system, including outcomes, the Department hopes to identify areas where the admissions system is working well and areas where it could be improved. With that in mind, when the template asks, "how well does the admission system serve the needs of

<sup>&</sup>lt;sup>1</sup> <u>Department for Education Statistical First Release</u>

<sup>&</sup>lt;sup>2</sup> The Education Middle School (England) Regulations 2002

children," the Department appreciates that it is asking local authorities to make a subjective judgement, in the understanding that everyone's experience with the admission system will be different. The Department encourages local authorities in responding to the open questions and spaces for open comments to set out challenges that are proving difficult to overcome.

- 8. Guidance on specific questions and/or meaning of specific terms in this report:
  - a. "in-year admissions": This means admissions (that is children admitted to a school and not applications for places):
    - i. to a year group which is not a normal point of entry for the school concerned (for example to Year 2 for a five to eleven primary school); and
    - ii. after the end of the statutory waiting list period (31 December) to a year group which is a normal year of admission for the schools concerned (such as Year R and Year 7).
  - b. Not applicable means that there were no children falling within the relevant definition.
- 9. We welcome all comments that local authorities make in the comment boxes and we aim to reflect those comments in the Annual Report, but we ask for the comments to be entered under the right headings. Section 3 invites comment on any other matters not specifically addressed in this template if local authorities wish to do so. The views expressed in previous years also remain a matter of public record.
- 10. We ask that where possible, you return the template in Word instead of PDF formatting. A number of you have commented on the formatting of the template and we have tried to make it as accessible as possible, but we are aware that some local authorities use different versions of Word.
- 11. Where questions request a comparison with the previous year, any new local authorities formed as a result of reorganisation should note this on the form.

#### Information requested

#### **Section 1 - Normal points of admission**

#### A. Co-ordination

Which of the following best describes the level of challenge for your main admissions round in 24/25 compared to 23/24?

Year Group	Much less challenging	Less challenging	No change	More challenging	Much more challenging
Reception		X			
Year 7				Χ	
Other relevant years of entry					

Please give examples to illustrate your answer if you wish:

With the increased capacity for Reception year groups, we've been able to accommodate more parental preference offers. Additionally, the available capacity after offer day has made handling late decisions more efficient. However, the challenge lies in ensuring that schools remain sustainable despite declining enrolment numbers, with proposals in place to close one school and reduce PANs in others.

The Year 7 intake continues to present challenges. There have been more pressure with OAAs working with us to ensure sufficient capacity to meet demand in areas of the city. Although we are able to make offers to all children who apply on time, the real challenge lies in accommodating inward migration and handling the high volume of late applications. This has also had impacts on appeal outcomes with panels allowing high number of appeals based on OAAs not understanding their appeal responsibilities, combined with difficulty having alternative places to suggest to children.

Additionally, we face ongoing issues with OAAs not adhering to timelines, delaying decisions, and sharing information promptly. This lack of timely information sharing impacts our coordination, despite clear legislative requirements for OAAs to prioritise it.

Please provide any comments you wish to make on the admission of children with special educational needs and/or disabilities at normal points of admission:

Nottingham City continues to achieve over 90% rate in amending EHCPs in line with key stage transfer timescales. Whilst our performance has remained high, the council has concerns how they will continue to meet the preferences of parents as specialist school sufficiency deficits grow.

# Section 2 - In-year admissions

# A. Which of the following best describes the overall level of challenge for your in-year admissions in 24/25 compared to 23/24?

Phase	Much less challenging	Less challenging	No change	More challenging	Much more challenging
Primary			X		
Secondary			X		

If you wish, please explain the factors that have changed the level of challenge for your in-year admissions:
In-year admissions continue to be a significant challenge as they were last year. Throughout the year, fair access has been our only option for placing children without a school place, particularly in key stage 2 which continues to see high mobility with a significant challenge on available places.

<ul> <li>iv. If you wish, please provide any comments about how well in-year admissions works for children who are not looked after or previously looked after and/or do not have SEND:</li> </ul>	
We are confident in our processes and ability to carry out work in line with the school admissions code. Our processes come under strain only where capacity issues are present.	
v. If you wish, please provide any other comments on the admission of children <b>in-year</b> not previously raised (you may wish to include here any comments about cases where it has not proved possible to find places for children):	

## **Section 3 - Other matters**

Are there any other matters that the local authority would like to raise that have not been covered by the questions above?

There is a strong need for OAAs to have a stricter framework for co-operation/ co-ordination with the local authority. The current legislation is not firm enough to institute a sense of responsibility in some OAA schools.
Section 4 - Feedback  We would be grateful if you could provide any feedback on completing this report to inform our practice for 2026.

Thank you for completing this template.
